1.16	The Impact of ICT in Education & Learning ( <i>pending</i> )								TBC
1.17	The Future of Work								29
1.18	The Global State of Health Care & Impact of ICT								31
1.19	Cloud Computing - Implications & Impact (Joe Weinman) ( <i>pending</i> )								TBC

## 1.4 Smart Cities

- **Objectives** (applicable to IT Education):
  - To understand evolution and trends in implementation of smart city technologies
- **Recommendations** (applicable to IT Education):
  - 3. **Academic, public and private sectors** need to join as partners in the **exploration, planning, and implementation** of Smart City Technology, Infrastructure and Services

# 1.5 State of State of Cyber Security

- **Digital Age** is continuously threaten by **Cyber Security**
- New threats are based on technological innovations
- **Internet of Things (IoT)** education with Cyber Security management skill is the most demanding of the time.

# 1.8 Building and Sustaining a Thriving IT Sector

- Working towards **Digital Economy** through:
  - Mutual collaborations and participation
  - Co-creation and co-developments
  - Growth based digital economy

# 1.9 National Digital Strategies

- Develop **Digital Agenda** based on priority for National development
- Review **Digital Agenda** through periodic review of the development
- **Digital Agenda** based educational development

# 1.10 Women in Technology

- Educate girls using IT
- Engage in Code Girl Challenges
- Engage in NGPC (National Girls Programming Contest)
- Engage in “code for change”

# Dynamics at Daffodil International University

We believe in  
**100% employment**  
**“Every Graduate: A Potential Employer”**

# Dynamics at Daffodil International University

- Curricula Enhancement
- Smart Card and Student Tracking
- Big Data and Cloud Integration
- IoT in the Classroom
- Cyber security
- Empowerments

# Curriculum Enhancement

- **CSE, SWE and MTCA curricula is updated (on regular basis):**
  - **Embedded Systems Design**
  - **Internet of Things (IoT)**
  - **Big Data and Analytics**
  - **Cloud Development and Management**
  - **Cyber Security**
  - **Mobile Apps Design and Development**
  - **Data Center Design and Management**

# Smart Card and Student Tracking

- Our students are provided with Smart Card and one single point of service delivery
- RFID implementation creating an eco-system for campus presence of student
- Attendance in the classroom is automated using system intelligence
- Students are enjoying essence of technology

# Big Data and Cloud Integration

- Data Center at the university is playing the central role
- Moodle LMS is customized for professional online delivery of learning modules
- Social Media including Google education products like Google classroom is deployed for students
- Learning Feedback system is widely for virtual collaborations

# IoT in the Classroom

- **Modern digital classrooms are developed using Internet of Things (IoT) to enable:**
  - **Classroom session management and monitoring**
  - **Monitoring of classroom learning**
  - **Students interactions with the learning repositories**
  - **Classroom environment management**

# Cyber Security

- **Cyber Security Lab setting up new mileage for skill developments**
- **Professional courses from EC council and SANS**
- **Research based tool development for persistent threat modeling**
- **Cyber Security awareness program**

# Empowerments

- We believe in empowerments
- Daffodil International University devoted to Entrepreneurship development
- Only university in Bangladesh offers Bachelor program in Entrepreneurship
- Our students believes in employment creation
- Startup Market, Business Incubator are a few to mention the drives

# Conclusion

- **WCIT 2016 recommendations focuses on Digital Nation, Digital Agenda and living with digital services**
- **IT education is the most crucial player to utilize the digital agenda to its fullest**
- **Continuous adoption of recommendations with scale up approach is the key to success**
